CAREER OBJECTIVE

Aspiring Software Engineer specializing in full-stack development and applied AI, with hands-on experience building REST APIs, React front ends, and cloud-integrated data pipelines. Seeking an entry-level Software Engineer / AI-ML role to design scalable, production-ready systems.

TECHNICAL SKILLS

Languages: Python, JavaScript (Basics), SQL

Web & Frameworks: React, Flask, REST APIs, HTML, CSS, Tailwind CSS, JWT Auth

Databases: MySQL

Cloud & AI: Cloud Fundamentals, Machine Learning

Tools: Git, GitHub, Postman, Power BI

EXPERIENCE

Software Engineer Intern | Bluestock FinTech, Pune (Hybrid)

Jun 2025 – Jul 2025

- **Built** and deployed a full-stack IPO management system using Flask REST APIs and React, implementing JWT authentication and role-based access control for admin and general users.
- **Engineered** reusable serializers and custom permission classes to keep IPO listing data synchronized in real time across [X]+ CRUD endpoints.
- **Authored** deployment and environment documentation (.env configuration, database migrations), cutting new-developer setup time and easing handoff for the team.
- **Tools:** Flask, React, Tailwind CSS, JWT, Git.

PROJECTS

Ziva — Full-Stack E-Commerce Platform

- **Developed** a full-stack e-commerce app (React, Flask, MySQL) covering product listings, cart, checkout, and order history for [X]+ products.
- **Secured** all protected routes with JWT-based, role-based access control, preventing unauthorized access to admin and checkout endpoints.
- **Synchronized** cart, checkout, and order data in real time via Flask REST APIs and Axios, backed by a normalized MySQL schema; deployed on Vercel.

LoanSense — Loan Default Risk Prediction System

- **Built** a machine learning pipeline in Python (pandas, scikit-learn) to predict customer loan default risk from financial and demographic data across [X]+ records.
- **Engineered** features through encoding, scaling, and class-imbalance handling (SMOTE), then trained and compared Logistic Regression, Random Forest, and XGBoost classifiers via cross-validation and hyperparameter tuning.
- **Deployed** the best-performing model as a Flask REST API and built an interactive Power BI dashboard to surface risk scores and key drivers for business stakeholders.

CERTIFICATIONS

- Multi-Cloud Network Associate – Aviatrix Certified Engineer (ACE)
- AI Foundations Associate – Oracle University
- Front End Web Developer – Infosys Springboard
- Programming Fundamentals using Python (Part 2) – Infosys Springboard
- Google Analytics Certification – Google

ACHIEVEMENTS

- **3rd Prize, Pitch Perfect** — Chennai Institute of Technology, organized by TALOS (2026); received a Certificate of Appreciation for contribution and presentation.
- **Semi-Finalist, ET-AI Hackathon 2026** — The Economic Times; recognized for innovation and building AI solutions in a national-level hackathon.

EDUCATION

B.Tech, Artificial Intelligence & Data Science | St. Joseph's College of Engineering

Sept 2023 – Oct 2027

CGPA: 7.9

Higher Secondary Education | Mangalam Matriculation Higher Secondary School

Jun 2022 – Mar 2023

Percentage: 85.83
